

To whom it may concern:

S.A.M. Assembly #188, Provo, Utah, USA just held a lecture by Trevor Duffy from Johannesburg, South Africa, July 20, 2017. We had a good group of 22 attendees. It was a great lecture. Trevor is very personable and put the group at ease right off the bat. His wonderful cards and coin magic were very good to see. But I think the hit of the lecture was the smoke device he has created and sells. It was truly magical the way the smoke just seemed to appear around a deck of cards, or as a coin vanished.

Of course, he presented the “Phil Trick” that he is well-known for. Always a hit, and I noticed some of the magicians bought 2 and 3 of them to keep as backups.

It was a lecture that everyone enjoyed—lots of great comments by all.

If any club gets a chance to have Trevor, jump at it. You may not know of him, yet, but as he tours the USA it won't be long before he is one of the top lecturers.
